Please add the following claims:

1

2

3 37. A method of operation of a mobile unit in a wireless communications system,
4 the method comprising the steps of:
5 the mobile unit initializing on a first carrier frequency; and
6 the mobile unit tuning to a paging channel of a second carrier frequency in response to a
7 message received on a sync channel of the first carrier frequency.

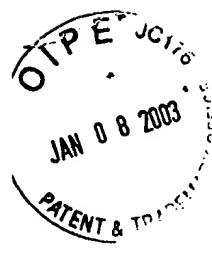

1 38. The method of Claim 37, wherein the step of initializing is preceded by the mobile
2 unit being powered up.

1 39. The method of Claim 37, wherein the step of initializing is preceded by the mobile
2 unit releasing a call on the first carrier frequency.

1 40. The method of Claim 37, further comprising the step of the mobile unit tuning to
2 the paging channel of the second carrier frequency in response to the message received on the
3 sync channel of the first carrier frequency.

1 41. The method of Claim 37, wherein the mobile unit is configured to receive a sync
2 channel message of the sync channel of the first carrier frequency and tune to the paging channel
3 of the second carrier frequency in response to a CDMA_FREQ field of the sync channel message.

1 42. The method of Claim 37, wherein the mobile unit is configured to receive the first
2 carrier frequency not having a paging channel.

PATENT APPLICATION

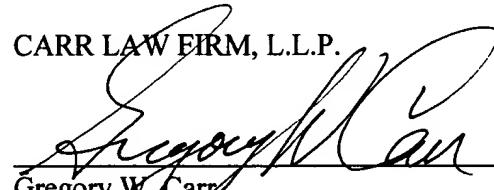

*A
encl* 1 43. The method of Claim 37, wherein the mobile unit is configured to utilize one or
2 more code division multiple access (CDMA) radio frequency links with the wireless
3 communications system.

1 44. The method of Claim 37, wherein the mobile unit is configured to receive a
2 Pilot_PN field of a sync channel message of the sync channel of the first carrier frequency
3 comprising a Pilot_PN of the second carrier frequency.

Applicants do not believe that any fees are due; however, in the event that any fees are due, the Commissioner is hereby authorized to charge any required fees due (other than issue fees), and to credit any overpayment made, to Deposit Account No. 50-0605.

Respectfully submitted,
